

THE JOHN CARROLL SCHOOL

Calculator Requirements 2020-2021

From the Math Department:

All students must have a (Texas Instrument) TI-84+ (Plus) Graphing (hand-held) Calculator for their math classes.

These calculators are also used in many science classes as well. If a student has a TI-83+ from a previous purchase that will suffice; however, we recommend a TI-84+ for new purchases. Students may purchase the color TI-84 Plus CE Graphing Calculator if they wish.

Please save the UPC from the packaging of your new TI calculator purchase and turn it into your math teacher at the beginning of the school year. The Math Department is collecting UPCs from Texas Instruments' products in order to redeem them for classroom technology resources. More info about this program can be found at:

<https://education.ti.com/en/product-resources/volume-purchase-plan-accord>. Thank you for your assistance!

If you have any questions, please contact Math Department Chair Mr. Rob Torres at rtorres@johncarroll.org.
